

Research and recommendations for performance measures under regulated, industry-led, end-of-life electronics recycling programs in Canada

RFP Questions from Potential Bidders – as at July 3, 2009

* * *

Q: Can you tell us how many and or/which firms received this RFP?

A: This RFP is a public document, and is posted on the front page of www.eStewardship.ca, and as such, is open to any qualified bidders. It was also sent directly to a short list of firms (approximately 12) that were known to the bid manager as possessing related experience & knowledge.

Q: The compressed timing for the submission of a response makes it exceedingly difficult to meet the detailed requirements of the RFP on the designated submission date of July 14, 2009. Would it be possible to have an extension to provide the additional time needed to assemble the required documentation?

*A: The bid manager has received a number of related requests for a time extension, and has agreed that a one week extension can be granted to all potential bidders. The revised proposal submission date is now amended to be **5:00pm EST, Tuesday July 21, 2009**.*
